

GITHUB URL TRICKS

7 POWER TRICKS! SWAP 1 WORD!

Swap one word. Unlock superpowers!

Let's go!

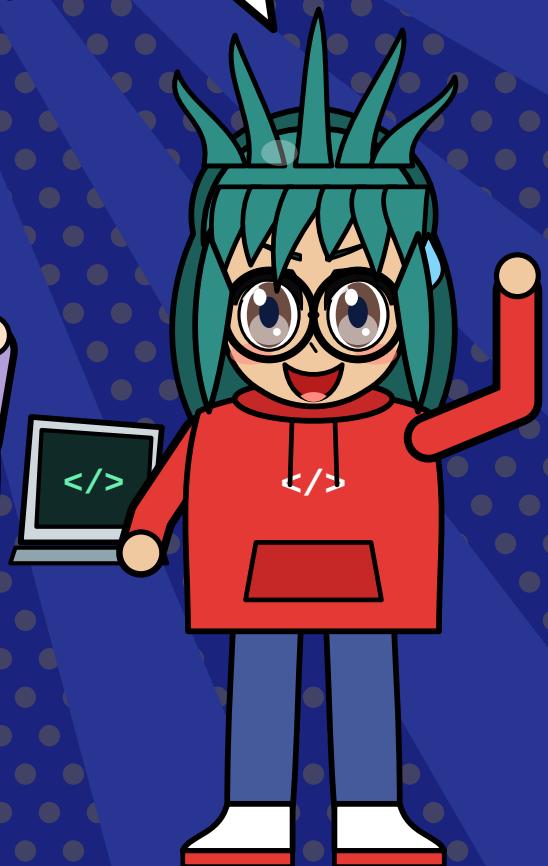

No cloning. No hassle!

KAI the Hero

MIMI the Quiet

ZIP the Coder

ALL 7

QUICK REFERENCE

1

GitDiagram Instant visual architecture map

SWAP: github.com -> gitdiagram.com

e.g. gitdiagram.com/vercel/next.js

2

GitIngest Turn a codebase into one AI-ready text file

SWAP: github.com -> gitingest.com

e.g. gitingest.com/vercel/next.js

3

GitHub1s Open any repo in VS Code, right in the browser

SWAP: github.com -> github1s.com

e.g. github1s.com/vercel/next.js

4

StackBlitz Open and run any repo in a cloud IDE

SWAP: github.com/user/repo -> stackblitz.com/github/user/repo

e.g. stackblitz.com/github/vercel/next.js

5

DeepWiki AI-generated wiki for any repo

SWAP: github.com -> deepwiki.com

e.g. deepwiki.com/vercel/next.js

6

GitHistory Watch a file's change history as an animation

SWAP: github.com -> github.githistory.xyz

e.g. github.githistory.xyz/vercel/next.js

7

GitMCP Expose any GitHub repo as an MCP endpoint

SWAP: github.com -> gitmcp.io

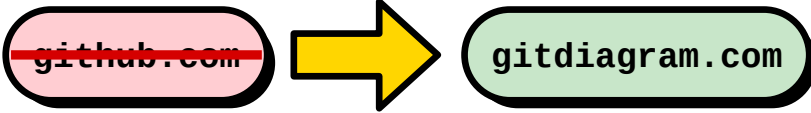

e.g. gitmcp.io/vercel/next.js

1

GITDIAGRAM

Instant visual architecture map

THE SWAP!

EXAMPLE:

gitdiagram.com/vercel/next.js

KAI the Hero

Behold! Your whole repo
as a map!

ZAP!

MIMI the Quiet

WHAT YOU GET

- 1 Generates a visual map of the project: files, folders, and how everything connects
- 2 Great for understanding a new codebase before you clone it
- 3 Works with any public GitHub repository, no login required
- 4 Useful for architecture diagrams in docs or presentations

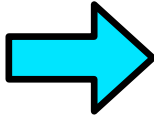

2

GITINGEST

Turn a codebase into one AI-ready text file

THE SWAP!

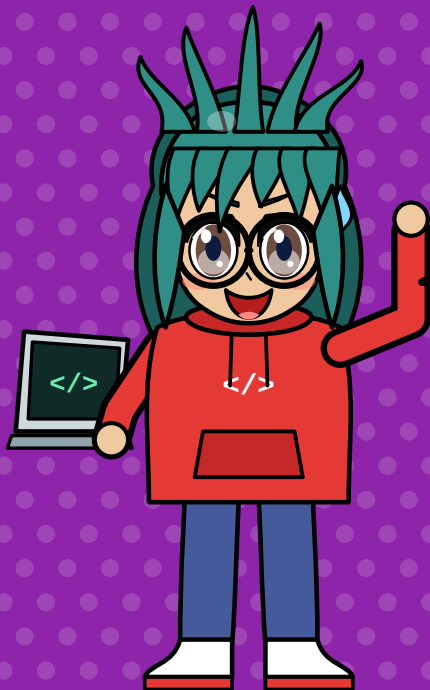

~~github.com~~

gitingest.com

EXAMPLE:

gitingest.com/vercel/next.js

ZIP the Coder

*One text file. Feed it to
any AI!*

BOOM!

KAI the Hero

WHAT YOU GET

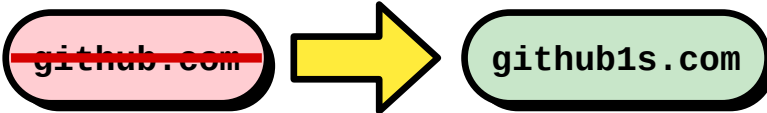

- 1 Converts the entire codebase into a single clean text file
- 2 Paste it into ChatGPT, Claude, or any LLM and ask questions about the project
- 3 Ideal for code reviews, unfamiliar projects, or onboarding
- 4 Skips binary files and focuses on the actual source code

3

GITHUB1S

Open any repo in VS Code, right in the browser

THE SWAP!

EXAMPLE:

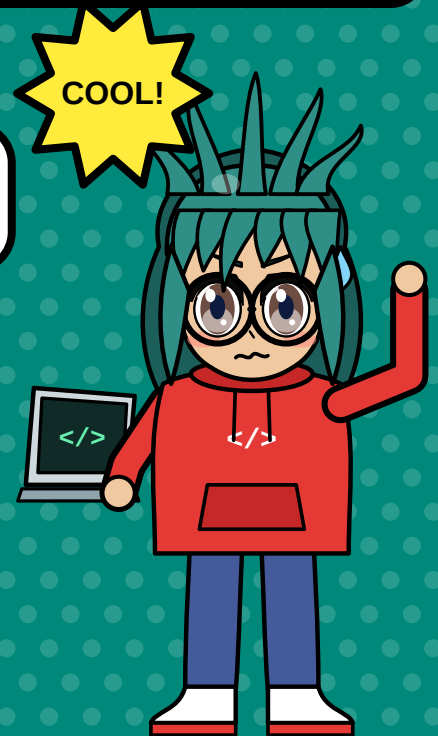

github1s.com/vercel/next.js

MIMI the Quiet

VS Code... inside a
browser tab!

POW!

ZIP the Coder

COOL!

WHAT YOU GET

- 1 Opens the repository in a full VS Code editor experience in your browser
- 2 No cloning, no setup: works on any public repo
- 3 Syntax highlighting, file tree, and search all work as expected
- 4 Great for quick code reading without touching your local environment

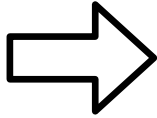

4

STACKBLITZ

Open and run any repo in a cloud IDE

THE SWAP!

~~github.com/user/repo~~

stackblitz.com/github/user/repo

EXAMPLE:

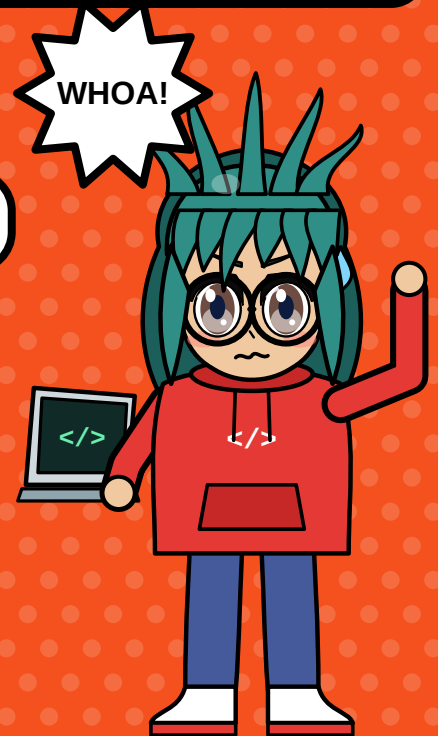

stackblitz.com/github/vercel/next.js

KAI the Hero

Click. Install. Run. Magic!

ZOOM!

ZIP the Coder

WHAT YOU GET

- 1 Opens the repo in StackBlitz, a full cloud development environment
- 2 Installs dependencies and runs the project automatically
- 3 Edit, run, and even fork the project without cloning
- 4 Best for web projects: supports Node.js, React, Next.js, and more

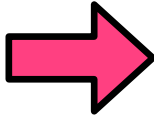

5

DEEPWIKI

AI-generated wiki for any repo

THE SWAP!

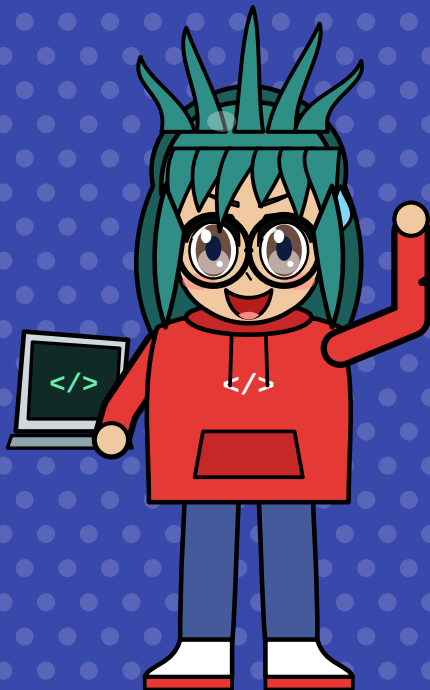

~~github.com~~

deepwiki.com

EXAMPLE:

deepwiki.com/vercel/next.js

ZIP the Coder

A wiki that writes itself!

WHOOSH!

WOW!

MIMI the Quiet

WHAT YOU GET

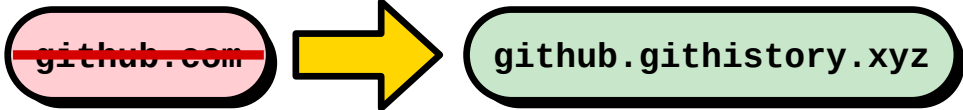

- 1 Automatically generates a structured wiki explaining the repository
- 2 Covers architecture, key modules, how components connect, and usage patterns
- 3 Useful for onboarding to a project or evaluating a library
- 4 Updates as the repo changes, with no manual documentation needed

6

GITHISTORY

Watch a file's change history as an animation

THE SWAP!

EXAMPLE:

`github.githistory.xyz/vercel/next.js`

MIMI the Quiet

*Rewind time, one commit
at a time!*

TICK-TOCK!

KAI the Hero

WHAT YOU GET

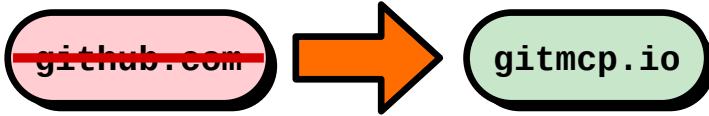

- 1 Shows an animated, step-by-step replay of every change made to a file
- 2 Navigate commits visually: see additions, deletions, and rewrites over time
- 3 Great for understanding how a complex file evolved or who changed what
- 4 Works on individual files: navigate to a specific file in the repo first

7

GITMCP

Expose any GitHub repo as an MCP endpoint

THE SWAP!

EXAMPLE:

gitmcp.io/vercel/next.js

KAI the Hero

*Plug any repo into your
AI tools!*

ZING!

YES!

MIMI the Quiet

WHAT YOU GET

- 1 Turns any public GitHub repository into an MCP (Model Context Protocol) endpoint
- 2 Lets AI tools like Claude, Cursor, or other MCP-compatible clients query the repo directly
- 3 No setup required: swap the URL and point your AI tool at it
- 4 Enables AI assistants to read, search, and reason over a codebase

3 STEPS!

Same pattern, every time

1

Go to any public GitHub repo

2

Copy the URL from your browser's address bar

3

Replace the word shown, then press Enter

TIP: These are third-party services for public GitHub repositories. Features, limits and availability can change, so check each site before relying on it.

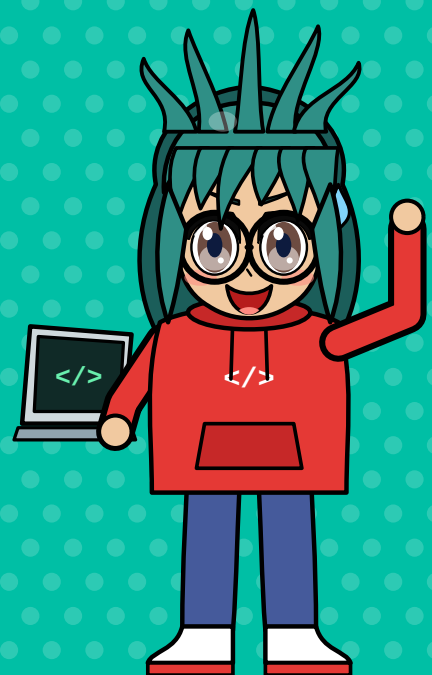

You're ready!
