

LINKEDIN RECRUITER OUTREACH

6 STEPS
+ BONUS!

USING META MUSE

Your comic guide to finding the recruiters and hiring managers who are **ACTIVELY** hiring.

Don't just search for jobs...

...find the people who are actively hiring!

STEP

1

TELL MUSE YOUR TARGET

FIRST, connect your LinkedIn + resume to Muse.
THEN paste this prompt:

PASTE THIS PROMPT

My target roles are **[DevOps Engineer, SRE, DevSecOps Engineer]**. I'm based in **[City/State]** and open to **[remote/hybrid/on-site]** opportunities. My work authorization is **[H1B/OPT/etc.]**. I have **[X]** years of experience with **[AWS, Azure, Kubernetes, Terraform, Jenkins, CI/CD, etc.]**.

Analyze my resume and LinkedIn profile and find LinkedIn recruiters and hiring managers who have recently posted about hiring for roles that match my experience. Focus on posts from the past 7 days and prioritize people whose hiring needs closely match my skills, experience, location, and work authorization.

TIP: Swap everything in [brackets] for your own details.

Here's my target, Muse!

PASTE
IT!

Got it! Let's find the people who are hiring.

STEP

2

FIND THE RIGHT RECRUITERS

THEN USE:

For each relevant recruiter or hiring manager, provide:

- 1 Full name
- 2 Current title
- 3 Company
- 4 Type — Recruiter or Hiring Manager
- 5 LinkedIn profile URL
- 6 Role they are hiring for
- 7 Job location
- 8 Job/post URL
- 9 Post date
- 10 1-2 lines explaining why this person and opportunity are a strong match for my profile

SKIP THESE!

- ✗ Job-board spam
- ✗ Generic hiring posts
- ✗ Reshares without a specific opportunity
- ✗ Roles that don't match my seniority, skills, location, or work authorization

Prioritize the most relevant and recently active people first.

STEP

3

CREATE YOUR RECRUITER WATCHLIST

ASK MUSE TO ORGANIZE THE RESULTS INTO A TABLE WITH THESE COLUMNS:

Priority

Name

Type

Title

Company

Hiring For

Location

LinkedIn Profile

Job/Post Link

Posted

Why It's a Match

Status

USE:

PRIORITY 1

1

Recent post + strong skill match + right location

PRIORITY 2

2

Good match but has a minor caveat

SET EVERYONE'S INITIAL STATUS TO:

NOT CONTACTED

This makes it much easier to track who you've already contacted.

STEP
4

PERSONALIZED CONNECTION NOTES

USE THIS PROMPT:

PROMPT

Using the recruiter/job information above, create a personalized LinkedIn connection note for each person. Keep every note under 300 characters. Mention the specific role/company where relevant and briefly connect it to my background. Do not make the messages sound generic or AI-generated.

Do not exaggerate my experience or claim that I applied unless I actually did.

UNDER 300
CHARACTERS!

EXAMPLE:

● Add a note to your invitation

Hi **{FirstName}**, I came across the **{Role}** opening at **{Company}**. I'm a **{Your Title}** with **{X}** years of experience in **{Key Skills}** and I'm very interested in the opportunity. Would love to connect!

NOT GENERIC • NOT EXAGGERATED • NEVER A FAKE "I APPLIED"

Short, specific, and human!

Nice note! Happy to connect.

STEP

5

SEND REQUESTS CAREFULLY

BEFORE SENDING, ask Muse to help you identify the most relevant people first.

THEN manually review the requests before sending.

PRIORITIZE

- ✓ Strong skill match
- ✓ Recent hiring activity
- ✓ Relevant location
- ✓ Relevant seniority
- ✓ Recruiters who are actually associated with the opportunity

Review first!

WATCH OUT!

- ✗ Don't send the same person another request if you're already connected or have a pending invitation.
- ✗ Don't try to mass-send invitations. Keep your outreach targeted.
- ✗ Follow whatever limits LinkedIn shows on your account.

Quality over quantity!

REVIEW EVERY REQUEST BEFORE YOU SEND.

STEP

6

TRACK EVERYTHING

AFTER OUTREACH, UPDATE YOUR WATCHLIST:

INVITE SENT

ALREADY
CONNECTED

SEND FAILED—
RETRY LATER

REPLIED

NO RESPONSE

**AND NEVER CONTACT THE SAME PERSON
TWICE FOR THE SAME OPPORTUNITY.**

Check it off, every time!

BONUS!

TURN IT INTO A SCHEDULED TASK

Instead of doing the whole search manually every day, create a scheduled task in Muse.

USE THIS

Every weekday, check for newly posted LinkedIn hiring activity from recruiters and hiring managers that matches my target roles, experience, location, and work authorization. Prioritize opportunities posted recently and identify the most relevant recruiters.

Create an updated report with their name, company, role, LinkedIn profile, job/post URL, posting date, and why they match my profile.

Do not include duplicate people I've already contacted. Keep track of previously identified recruiters and opportunities.

EVERY WEEKDAY

Your report, ready and waiting!

You can choose a schedule that works for you and your available tokens.

Instead of constantly searching LinkedIn yourself, you have a repeatable recruiter-outreach workflow running in the background.

THE COMPLETE WORKFLOW

SAVE THIS GUIDE so you can reuse the prompts whenever you're job hunting.

AI should help you find and organize the right opportunities — always review the results before sending anything on your behalf.
